

Company Profile

YOUR DEPENDABLE
PROFESSIONALS FOR EPCIC

DP

DEPENDABLE PROFESSIONALS

Our dedication to excellence since the incorporation of DP Controls in 1991 has resulted in us being the trusted **EPCIC** solution provider for local and international clients.

Our team approach along with a passion for dynamic innovation centred on client's needs and their ultimate success make us the **Dependable Professionals** you can trust.

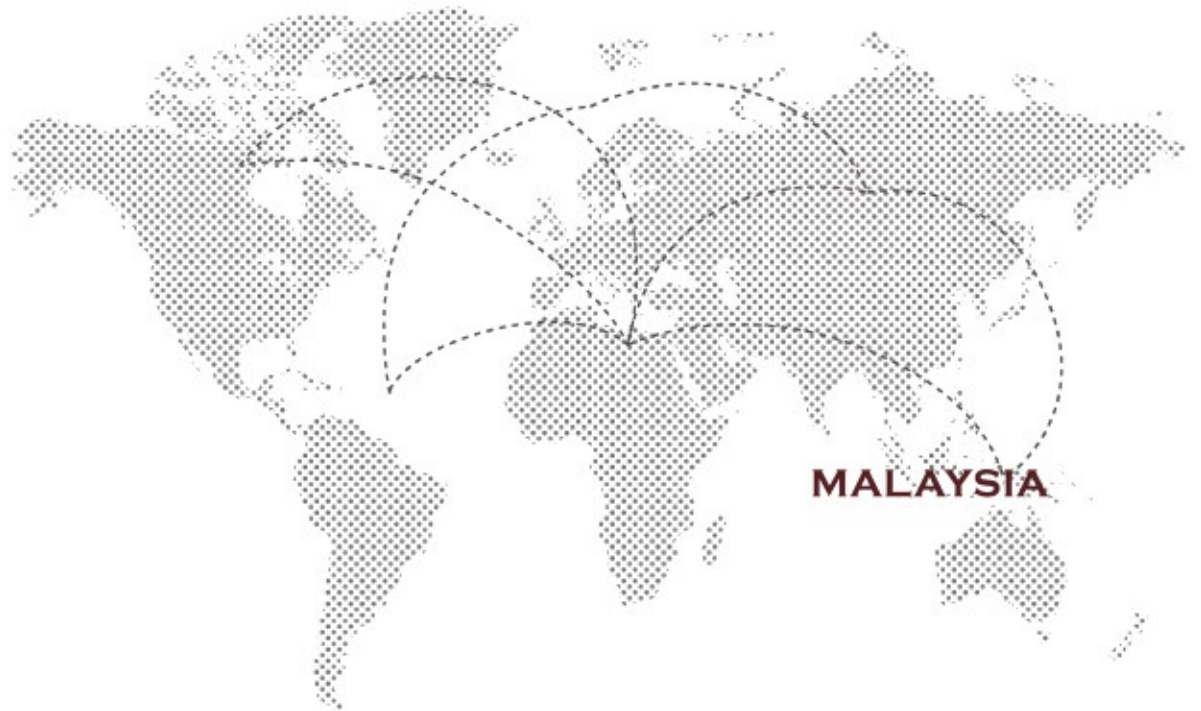

OUR VISION

DEPENDABLE
PROCUREMENT

Our Vision - is fundamentally tied to the success we provide our clients. We work to be recognised as the go-to **D**ependable **P**rovider of engineered end-to-end **EPCIC** solutions in the fields of Electrical, Instrumentation and Automation Control for Water, Energy, Building, Factory, Process Plant, Chemical Plant and Oil & Gas Industry.

OUR MISSION

Our Mission – is to build our capability every day so to demonstrate our Dependable Professionalism.

We achieve this through excellence in:

- **Improving our Project Management Performance** 1
- **Developing our People** 2
- **Creating Value-adding Processes** 3
- **Leveraging our Engineering Knowledge for Innovative Solutions** 4
- **Working in Partnership with our Clients** 5

OUR CORE VALUES

- We set our expectations high as we know the customer is at the centre of all that we do
- We live up to our promises and continue to improve
- We invest in our people as they are our greatest asset
- We actively listen and seek new ideas
- We work as a team with our client as the Most Valuable Player
- We must deliver quality results as anything else is not an option
- We actively create an environment that supports personal and professional growth

THE TEAM & CULTURE

Our culture creates the strong and agile team.

We live to identify and apply innovative solutions to the **EPCIC** challenges our clients face every day. By always pushing to achieve more we have the opportunity to offer key cost effective and robust engineered results for all stakeholders.

DEPENDABLE
PEOPLE

CORE SERVICES

We have a simple philosophy – to provide excellence with a core focus on **EPCIC** and the capabilities that support it.

EPCIC

Engineering, Procurement, Construction, Installation & Commissioning:

This is where our end-to-end project experience is in full flow.

The words that **EPCIC** explain clearly the WHAT that needs to be done.

You need to talk to DP Controls as where the successful solution is created is in knowing and explaining to the client the WHY and the HOW.

We are passionate about helping the client see WHY and HOW our solutions will improve their effectiveness, efficiencies, and economics.

Our core team of engineers provide assistance every step of the way:

DEPENDABLE
PROFESSIONALISM

SYSTEM INTEGRATION FOR EPCIC

Our engineering team are expert in creating pre-configured solutions that are incorporated into our **EPCIC** solutions for clients so to benefit from innovative integration of 'off-the-shelf' hardware and software components. With an eye for cost-effectiveness and value adding, the right solution can be created at the right price.

- Design and build of system architecture and applications
- Integrations with existing hardware and software
- Packaged and customised integrations

AUTOMATION PARTS, THE FOUNDATION OF SUCCESSFUL ENGINEERING SOLUTIONS

The foundation to all our engineering solutions is the quality and capability of the individual parts.

This is why we are continually seeking out the latest automation parts and offering them to our clients.

We gain knowledge of what works and what doesn't work through our **EPCIC** Solutions so we have become an encyclopedia that our clients can easily refer to.

We will supply exactly the part required because we know the entire WHY and HOW.
